

Job Title : System Administrator, Manager

OVERALL PURPOSE:

• This role is responsible for managing and maintaining the bank's IT infrastructure, including servers, storage, and networking devices. The System Administrator will work closely with other IT teams and end-users to ensure that the bank's IT systems are secure, reliable, and efficient.

RESPONSIBILITIES:

- Install, configure, and maintain the bank's IT infrastructure, including servers, storage, and networking devices.
- Ensure the security and integrity of the bank's systems, including implementing access controls, monitoring for security threats, and applying software updates and patches.
- Monitor and optimize system performance, including server utilization, storage capacity, and network bandwidth.
- Develop and implement procedures for routine maintenance and upgrades of hardware and software.
- Respond to end-user requests for technical assistance and support.
- Maintain documentation for the bank's IT infrastructure, including configuration, processes, and procedures.
- Collaborate with other IT teams and end-users to ensure that the bank's IT systems support the organization's overall IT strategy.

QUALIFICATIONS REQUIREMENTS:

- Bachelor's degree in Computer Science, Information Technology, or a related field.
- 3+ years of experience as a System Administrator.
- Strong knowledge of IT infrastructure technologies, including servers, storage, networking, and security.
- Experience with virtualization technologies, such as VMware or Hyper-V.
- Experience with scripting languages, such as PowerShell or Python.
- Excellent communication and collaboration skills, with the ability to work effectively with other IT teams and end-users.
- Familiarity with banking applications and software, such as core banking systems, would be an advantage.
- Willingness to work outside of normal business hours to perform system maintenance and upgrades as required.
