

**Job Title : Manager Data System**

**OVERALL PURPOSE:**

- ◆ Overall responsible for the management and development of the bank's data systems and DataMart solutions, ensuring the accuracy, completeness, and security of the data. The role involves working closely with business stakeholders, data analysts, and the IT department to develop and implement data warehouse and DataMart strategies.

**RESPONSIBILITIES:**

***Main Responsibilities:***

- ◆ Manage the bank's data warehouse and DataMart solutions, ensuring they are designed, developed, and maintained in accordance with best practices and standards.
- ◆ Oversee the integration of data from different sources into the data warehouse and DataMart solutions, ensuring data quality and consistency.
- ◆ Work closely with business stakeholders to identify and prioritize data requirements and develop and implement strategies to meet those requirements.
- ◆ Collaborate with the data analytics team to develop and implement data models and algorithms that provide insights into customer behaviour, market trends, and risk management.
- ◆ Manage the bank's data governance processes, ensuring that data quality and integrity are maintained, and compliance with regulatory requirements is achieved.
- ◆ Keep up to date with emerging trends and technologies in data warehousing and DataMart solutions and recommend ways in which the bank can leverage these to improve its operations.
- ◆ Communicate the results of data analysis to business stakeholders and senior management, ensuring that the insights gained are effectively applied to the bank's decision-making processes.
- ◆ Manage and mentor the team, ensuring they are up-to-date with the latest technologies and best practices.

**QUALIFICATIONS REQUIREMENTS:**

- ◆ Bachelor's or master's degree in computer science, Information Systems, or a related field.
- ◆ 5+ years of experience in data warehousing, with a focus on data modelling, ETL processes, and DataMart solutions.
- ◆ Strong understanding of data management principles, including data quality, data governance, and data security.
- ◆ Experience with SQL and other database technologies, as well as data warehousing and ETL processes.
- ◆ Strong leadership and management skills, with experience in managing teams of technical professionals.

- ◆ Excellent communication and interpersonal skills, with the ability to work effectively with technical and non-technical stakeholders.
- ◆ Understanding of regulatory requirements related to data management in the banking industry.
- ◆ Experience with cloud-based data platforms such as AWS, Azure, or Google Cloud is a plus.
- ◆ Relevant industry certifications such as Microsoft Certified: Azure Data Engineer Associate or Oracle Certified Professional, Data Warehousing and Business Intelligence would be an advantage.
