Job Title: Network Security Manager

We are seeking a highly skilled and experienced Network Security Manager to join our IT team at Vattanac Bank. The successful candidate will be responsible for managing the bank's network security operations, including designing, and implementing security policies, procedures, and tools to ensure the security and integrity of the bank's network. The Network Security Manager will work closely with other IT teams and senior management to ensure that the bank's network security supports the organization's business objectives.

RESPONSIBILITIES:

♦ Develop and implement network security policies and procedures, including access controls, incident response, and vulnerability management.

♦ Design, configure, and maintain the bank's network security devices, including firewalls, intrusion detection and prevention systems, and other security devices.

♦ Monitor and analyze network traffic to detect and prevent security breaches.

♦ Work with other IT teams and end-users to ensure that the bank's network security meets the organization's business objectives.

♦ Manage vendor relationships for network security devices, including procurement, maintenance, and support.

♦ Develop and implement procedures for routine maintenance and upgrades of network security devices.

♦ Maintain documentation for the bank's network security, including configuration, processes, and procedures.

♦ Develop and deliver training programs for end-users and other IT teams on network security best practices.

QUALIFICATIONS REQUIREMENTS:

♦ Bachelor's degree in Computer Science, Information Technology, or a related field.

♦ 7+ years of experience in network security, including managing network security operations in a large-scale environment.

♦ Strong knowledge of network security technologies, including firewalls, intrusion detection and prevention systems, and other security devices.

♦ Experience with network protocols, including TCP/IP, DHCP, DNS, and VLANs.

♦ Experience with scripting languages, such as PowerShell or Python.

- ♦ Excellent communication and collaboration skills, with the ability to work effectively with other IT teams and senior management.
- ♦ Familiarity with banking applications and software, such as core banking systems, would be an advantage.
- ♦ Willingness to work outside of normal business hours to perform system maintenance and upgrades as required.

If you have a passion for network security, a dedication to providing excellent customer service, and a strong desire to contribute to the success of a leading bank in Cambodia, we encourage you to apply for this exciting opportunity.
