

Job Title : Senior API & System Integration

OVERALL PURPOSE:

- ◆ The Senior API and System Integration Specialist will:
 - Design, implement, and manage APIs and integrations between diverse systems.
 - Ensure seamless communication and data exchange across applications.
 - Enhance system interoperability while adhering to security, scalability, and performance standards.

RESPONSIBILITIES:

- ◆ API Design and Development:
 - Design RESTful and SOAP APIs using best practices.
 - Develop, test, and deploy APIs ensuring scalability, performance, and security.
 - Document API endpoints, specifications, and usage.
- ◆ System Integration:
 - Analyse existing systems and design integration strategies.
 - Implement middleware and integration platforms (e.g., MuleSoft, Apache Camel, or Spring Integration).
 - Maintain compatibility between legacy systems and modern applications.
- ◆ Security and Compliance
 - Implement authentication and authorization mechanisms (e.g., OAuth 2.0, JWT).
 - Ensure compliance with data protection regulations (e.g., GDPR, HIPAA).
 - Conduct security audits and apply best practices to mitigate risks.
- ◆ Performance and Monitoring
 - Optimize API and integration performance.
 - Troubleshoot and resolve integration issues.
- ◆ Collaboration and Leadership
 - Work closely with cross-functional teams, including developers, business analysts, and project managers.
 - Mentor junior developers and provide technical guidance.
 - Contribute to architecture and system design discussions.
- ◆ Deliverables
 - Fully documented API specifications and integration workflows.
 - Deployed and tested API and integration solutions.
 - Technical documentation and user guides.
 - Regular progress reports and performance metrics.

REQUIREMENTS:

- ◆ Bachelor's degree in Computer Science, Information Technology, or a related field.
- ◆ At least 4 years of experience in API development and system integration.
- ◆ Proficiency in programming languages such as Java, C#, or JavaScript

- ◆ Experience with API management platforms.
- ◆ Strong knowledge of integration protocols and standards (e.g., REST, SOAP, Webhooks, GraphQL).
- ◆ Hands-on experience with database management and SQL/NoSQL technologies.
- ◆ Strong problem-solving and analytical skills.
- ◆ Ability to work independently and as part of a team.
- ◆ Honesty, reliability, and a commitment to strict confidentiality.
